## Optimo Ultra 12X Multiple Format Design : the 24-290 reference redefined

The new Optimo Ultra Zoom covers the familiar 24-290 12X range in S35 (T2.8). Thanks to the IRO Technology (Interchangeable Rear Optics), the lens covers multiple imaging formats up to Full Frame/Vista Vision, with optimized performances. The industry reference lens is now redefined with a completely new design, providing an even higher optical quality, stronger mechanics and easier maintainability. The perfect companion to Full Frame cameras.
